

# Take a look at SMG's Superior Durable Medical Equipment

## **TENS (Transcutaneous Electrical Nerve Stimulator)**

TENS is a safe, non-invasive, drug-free method of pain management that is effectively used to treat all types of chronic and acute pain.

## **Theratrak Lumbar Traction Unit**

The Theratrak Lumbar Traction Unit is an easy to use, highly functional, and very effective lumbar traction device, giving the user the ability to treat their condition at the most comfortable clinic on earth...their home. Theratrak utilizes pneumatic bladder technology giving it the unique ability to administer a moderate lumbar decompression stretch, to gently contour the innate spinal path and unload the weight on the lower lumbar.

## **Theratrak Cervical Traction Unit**

The Theratrak Cervical Traction system provides an even decompression of the anterior and posterior cervical discs, while supporting the spinal curve. The Theratrak cradles the head and neck via a curvature in the neck portion of the device, as well as a special head rest section that is vertically pneumatic.

## **Horizon 631 Lumbar Brace**

The innovative design of the Horizon 631 Lumbar Brace will provide your patients with comfortable support, motion restriction and pain relief. The ergonomic and low-profile design allows the brace to be worn comfortably under clothing.

In addition, the brace is easy to fit and adjust; one brace fits waists ranging from 24-70 inches (extension panel required for waists 50-70 inches).

## **Aspen Active™ Postural-TLSOLightweight**

Adjustable brace designed to address the symptoms associated with poor posture often due to prolonged use of electronic devices/technology. While actively influencing a patient's posture, the brace provides gentle support while activating postural stabilizing muscles.

## **Comfortland Hinged Knee Brace**

The Comfortland Hinged Knee Brace is comprised of lightweight, breathable materials, helping to keep patients comfortable while improving compliance.
